# HP UTILITY CENTER SOFTWARE

Complex networks. Simplified grid and network management.

Exponential growth in devices and data create grid management complexities. Customers expect immediate response. Event correlation across the enterprise propels efficiency.

and holistic view of your Smart Grid & networks operations

# HP UTILITY CENTER SOFTWARE

Improve top-line and bottomline operational returns

- Balance supply and demand across many brands and types of devices
- Limit usage as demand outstrips supply
- Event management and correlation to anticipate and assist with problem diagnostics
- Enhance quality monitoring and load profiling
- Effectively monitor and respond to theft/fraud
- Broaden tariff options; improve billing accuracy
- Increase revenue and cash flow assurance

# HP DESIGN, IMPLEMENTATION, AND MANAGEMENT SERVICES

Streamline and improve operational efficiencies

- Full solution design and deployment
  - End-to-end project management
  - Application design, development, and modernization
  - IT Infrastructure
- Integration services
  - AMI and MDMS applications
  - Legacy systems
  - Business and governance transformation
- Post deployment services
  - Hosting environment
  - Help desk services
  - Customer call centers
- Flexible pricing
  - Cloud computing
  - Pay per transaction
  - Pay per meter
