

## **Torsten Hammerschmidt, Asset Management, RWE Deutschland AG**

Torsten Hammerschmidt completed his study of electrical engineering at the University of Dortmund in 1998 with the degree Diplom-Ingenieur. After this he joined the power quality department at RWE in Essen. From technical customer consultation to transmission grid tasks he worked on a range of projects. In 2003 he changed to the asset management and worked on regulatory orientated asset strategies for distribution grids. Since June 2009 he has been the project manager of a national funded smart-grid project and is employed at the RWE Deutschland AG which is a german distribution grid owner.
