Key data

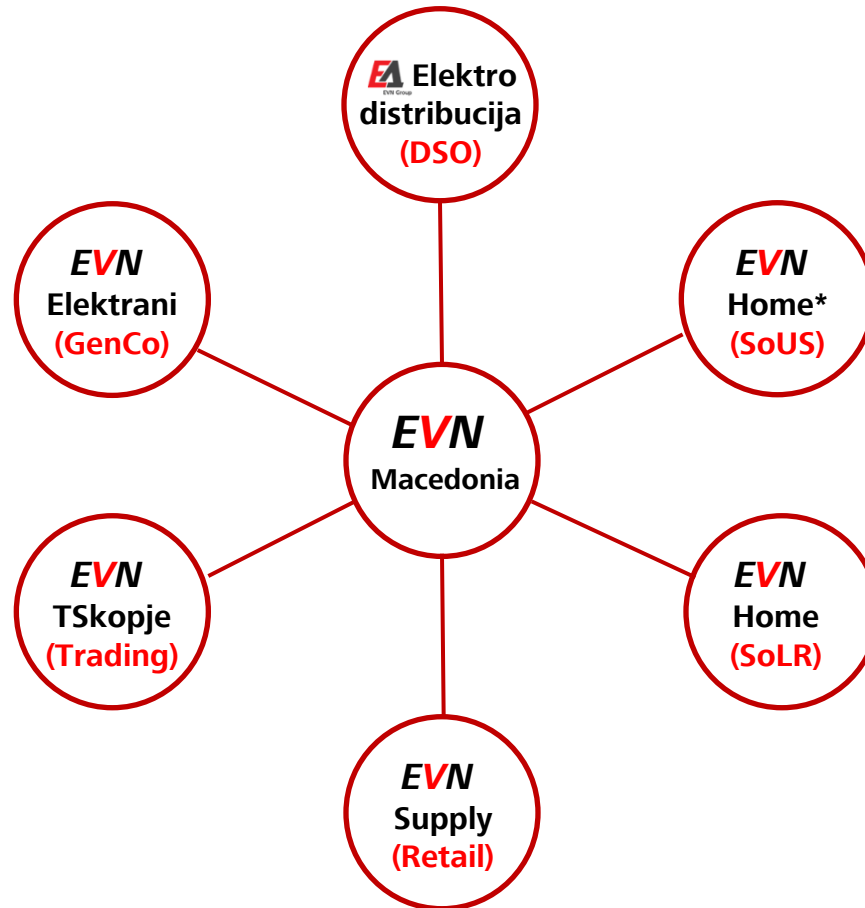

Roles of EVN in Macedonian market

Status from July 1st 2019

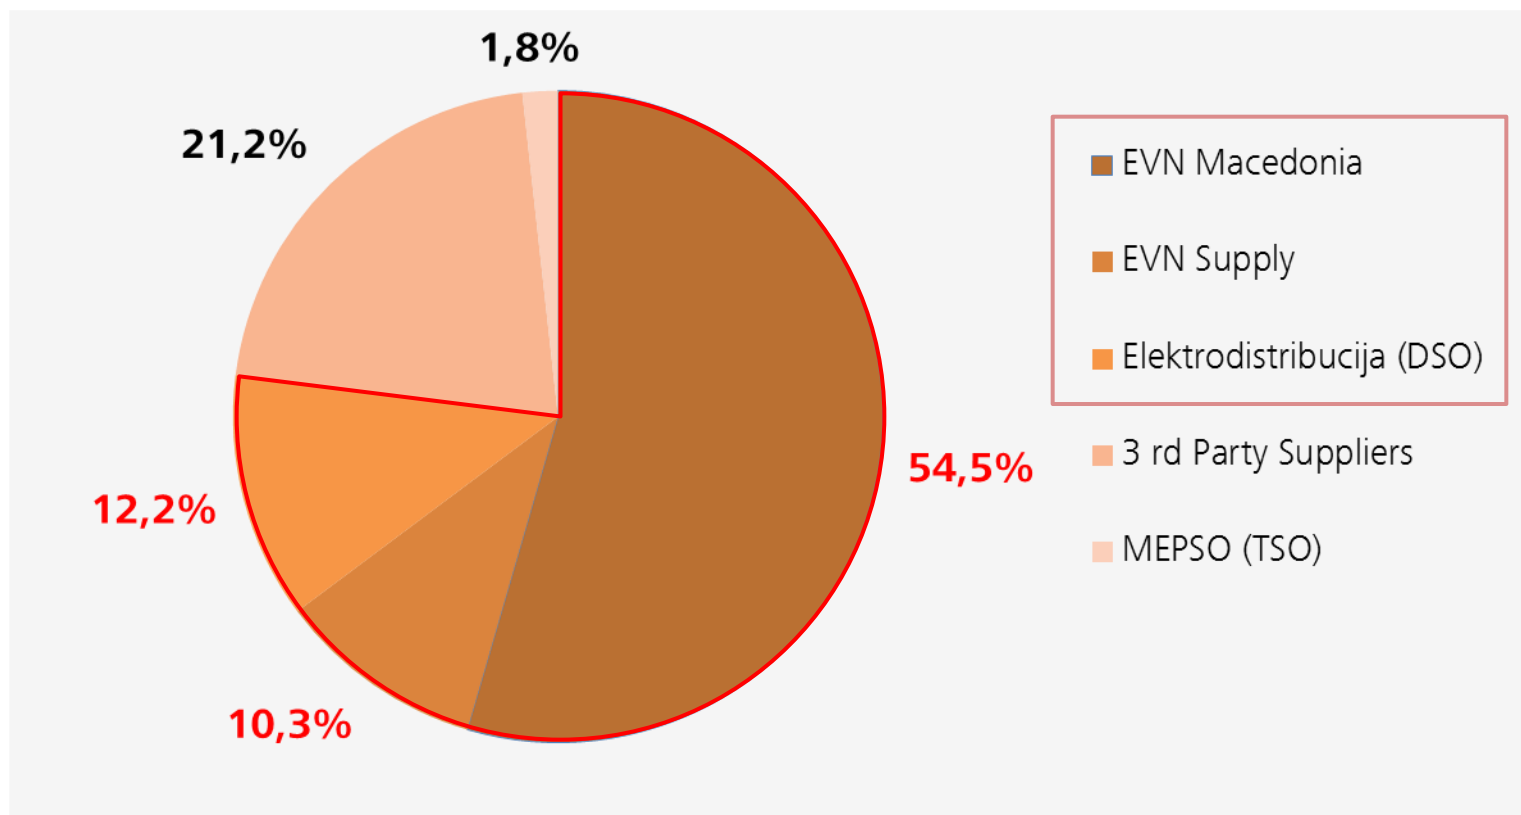

EVN operates through various companies in North Macedonia. This structure is result of the unbundling of the individual business areas in utility companies and the need to meet related requirements

*) Before July 1st 2019, the role of supplier for regulated customers and SoLR was performed by EVN Macedonia

EVN portfolio in Macedonian market

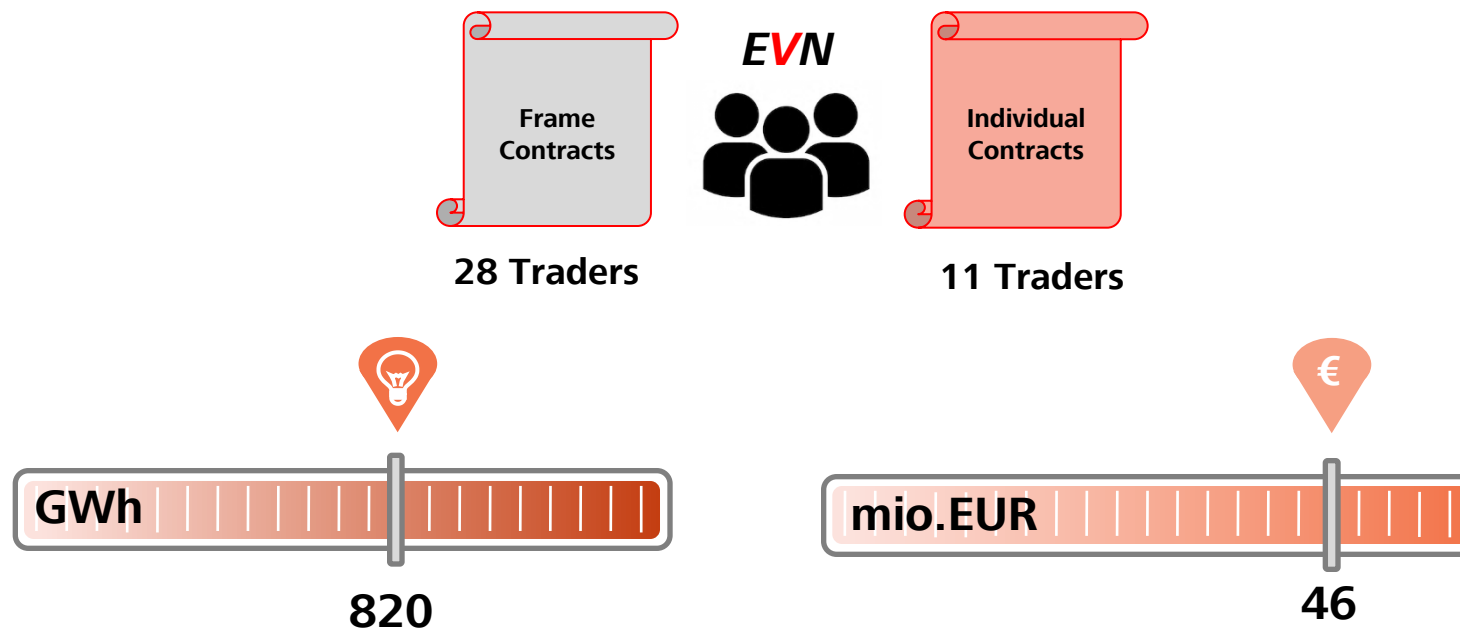

Total input volume in MK power grid: 7,1 TWh in 2018

77% of the total input volume in MK power grid for 2018 or **5,5 TWh** needed to be handle by EVN entities for their portfolio, on regulated or wholesale market

Cooperation with Trading Partners on wholesale

Status of EVN Macedonia regulated entities in 2018

Procuring and optimizing portfolio on wholesale market requires close cooperation between EVN Macedonia regulated entities and Trading partners based on fairness, transparency and on-time payment for obligations.

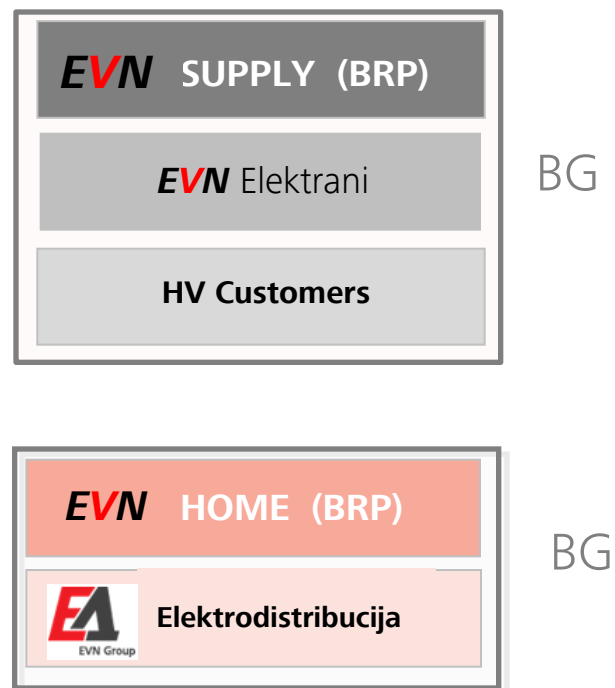

EVN Balance Groups

Further development and obligations

Current Status (Sep.2019)

New Status (Jan.2020)

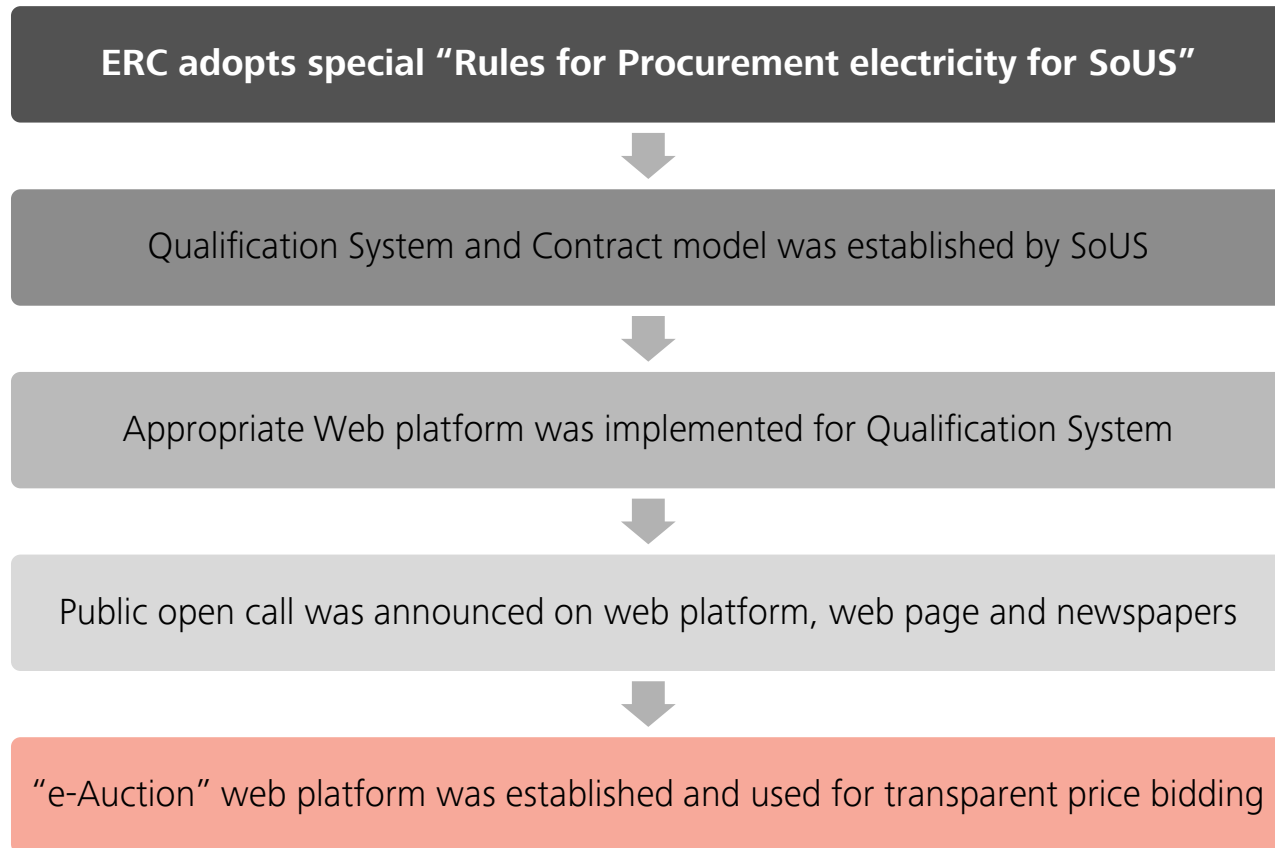

*) BRP – Balance Responsible Party

***) BG – Balance Group

Application of the Rules from ERC

The case of SoUS

“e-Auction” web platform established by EVN

Transparent and efficient price bidding

The screenshot displays the 'energy marketplace.com' interface for an electricity tender. The header shows the date and time (We., 18. September 2019 | 11:54:27) and the breadcrumb path: energy-marketplace.com > Energy Procurement > Elektrodistribucija #28 [#421].

Electricity-Tender #421: Elektrodistribucija #28

Valuation of bids: Ascending - the lowest bid wins

Bid list

Rank	Timestamp	Price (€/MWh)
1	27.08.2019 11:31:06	59,00
2	27.08.2019 11:31:59	59,00
